

When flying in: Right hand pattern for landing to the North on 03 and a left hand landing to the South on 21.

When landing to the North, just avoid flying directly over the houses at the end of the runway. Same holds true on departure to the South.

Frequency: 122.85

If you wish to fly in with a fixed gear single engine airplane you are more than welcome. It is a private field with glider traffic and possibly a new student in the pattern, so please give us a call by telephone before you fly in. It will help us with regard to possible traffic conflicts. We use 122.85. Our identifier is SC79 and we are on the "Charlotte" Sectional. The field is 8.5 miles on the 260 degree radial off the Chesterfield VOR and Latitude is 34 36 24, Longitude 80 27 00.
